**Subject: PowerSchool SIS Data Breach**

On January 7th, we were notified via email by PowerSchool representatives that a data breach occurred on December 28, 2024. The email from PowerSchool stated that it had been "determined that an unauthorized party gained access to certain PowerSchool Student Information System ("SIS") customer data using a compromised credential," and our data had been accessed.

We will continue to coordinate with PowerSchool to determine to what extent our student, staff, and parent information was accessed. We will also continue to inform our school community of the situation and any related details as they become available.

As per the recommendations of the State Department of Education's Chief Technology Officer, we are also informing our cyber insurance provider and legal counsel as needed as we continue to discern the scope of data that was compromised.

A handwritten signature in black ink, appearing to read 'Bruce Sims', is written over a light blue horizontal line.

Maj Bruce Sims  
Assistant Principal
